

This folder contains replication files for “Culture, Institutions and The Wealth of Nations” by Yuriy Gorodnichenko and Gerard Roland.

The data are in subfolder “data”. Data available for a fee (ICRG) are not uploaded. Data for Comin and Miesteri (2013) are available from the authors. Data for maps are in subfolder “maps”.

The code producing tables and figures is in subfolder “do_files”. STATA do-files are organized in a series of steps. The name of the file indicates the step in the sequence. The name of the file also indicates the purpose of the file (prepare data, run regression, plot figure). Steps 400-500 produce figures and tables reported in the paper. Steps 600-700 produce figures and tables reported in the online appendix. Data used for all figures and tables is in file “completed_data.dta” (STATA 14 version is required) in subfolder “workfiles”.

Contains data from completed_data.dta

obs: 170
vars: 132 15 Nov 2015 22:32
size: 88,910 (_dta has notes)
